

Thomas LOUIS-SARROLA

PhD Student in Statistical Physics

thomas.louissarrola@gmail.com | +33 7 86 53 76 37 | lsthomas.github.io

EDUCATION

PhD in Statistical Physics <i>Université Paris-Saclay, Orsay</i> High-dimensional dynamics: statistics of equilibria and dynamical trajectories. Supervised by Valentina Ros (CNRS) and Pierfrancesco Urbani (CNRS).	2025–2028
M2 in Complex Systems Physics <i>Sorbonne Université, Paris</i> Graduated with highest honours; awarded a doctoral-school scholarship in physics for the Île-de-France region.	2024–2025
M2 in Probability and Finance <i>Sorbonne Université, Paris</i>	2023–2024
École Polytechnique Engineering Programme <i>École Polytechnique, Paris</i> M1 in Fundamental Mathematics.	2020–2024

EXPERIENCE

Teaching Assistant <i>École Polytechnique, Paris</i> Analysis course for first-year bachelor's students (64 hours), taught with Frank Pacard.	2025–2026
Quantitative Researcher <i>Qube Research & Technologies, Paris</i> Six-month internship supervised by Augustin Landier (HEC Paris).	2025
Research Intern in Mathematical Physics <i>DMA, École Normale Supérieure, Paris</i> Four-month internship supervised by Isabelle Gallagher on deterministic and stochastic Navier–Stokes equations. Recipient of the 2023 research internship prize.	2023
Research and Development Intern <i>ID Quantique, Geneva</i> Three-month internship researching classical and quantum random number generators.	2022

PUBLICATIONS

Fragile vs robust multiple equilibria phases in generalized Lotka–Volterra model with non-reciprocal interactions.
Thomas Louis-Sarrola and Valentina Ros. *SciPost Physics* **21**, 014 (2026). doi:10.21468/SciPostPhys.21.1.014.

INTERESTS AND SKILLS

Sport	Basketball (captain of École Polytechnique's team); road and trail running.
Programming	Python, OCaml, Java, LaTeX.
Languages	French (native), English (fluent; international baccalaureate), German (intermediate), Corsican (basic).
